

Graduation Rates - University Transfers, Completions, Occupational and Student Satisfaction Trends

Eastern Arizona College is a community college, and as such, its mission differs from that of 4-year colleges and universities. While 4-year colleges and universities are designed for earning degrees, community colleges are designed to serve the unique educational needs of individuals within the community. Consequently, many students enrolled at community colleges may not intend to earn a degree or transfer. In addition, transfer data are tracked through a survey from students who voluntarily provide that information.

Many students from the 2019 - 2023 cohort transferred to other community colleges within Arizona a four-year college or university following the completion of their studies at Eastern Arizona College. Some of these colleges and universities included: Arizona State University, Northern Arizona University, University of Arizona, Brigham Young University, Utah State University, and New Mexico State University.
