

Title :	Credit for Apprenticeship Training, Licensing, or Other Agency Training or Examination	
Number :		6500.07
Approved :		07/01/03
Reference :		

If the student holds a valid and current license or accreditation for a specific skill or trade which included passing of an exam by a state or nationally recognized Board and has been actively practicing skill within the last five years, the student may petition for college credit in subject areas offered by GCCCD which will become a part of student's official transcript upon completion of 16 credit hours in courses in the GCCCD. The student must supply the name and address of the accrediting Board, trade school, or agency to the District Records Office. Upon request by the District Records Office, the place of prior accreditation must be willing to supply information about examination competencies. If this information is adequate for evaluation, the District Records Office, in consultation with the Division in which courses are listed, will determine the specific courses for which credit will be given on the official transcript. Transcript wording will be "Credit by departmental evaluation." If there is question about awarding of credit under these conditions, the student will be given the opportunity to earn the credits in question by examination as described under the Credit by Examination section. Credit may not be transferable for credit given by Apprenticeship Training, Licensing, or Other Agency Training or Examination.
